

27 May 2020

Dear Emmanuel MACRON,

VAN ERÉNY!

Please penalize tyrannical lawmaking in the EU as soon as possible!

- ✓ The six fundamental values of the EU are **fundamental** because the lack of these values is **extremely dangerous to society**.
- ✓ An act which is extremely dangerous to society **must be penalized in criminal code**.
- ✓ **Lawmaking** in member states **can violate** the six fundamental values of the EU.
- ⇒ Consequently, **lawmaking violating the six fundamental values of the EU must be penalized** since they are extremely dangerous to society by violating fundamental values.

The **Tavares and Sargentini Reports** officially confirmed that fundamental values are violated in Hungary. Practically, the society in Hungary is in extreme danger, since fundamental values are violated by corrupt lawmaking. Hence, the EU is in extreme danger too. **Tyranny is crime***.

Stop the tyrannical lawmaking in the EU! Stop serving the profit in favor of the six fundamental values! Please start penalizing the tyrannical lawmaking in EU-level criminal code at zero tolerance!

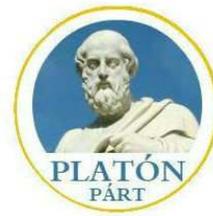

The Article 7 procedure against Hungary is ineffective, toothless. But, based on the **Lisbon Treaty** the EU has **jurisdiction to define new criminal code acts** in those cases where the type of crime has an impact **across member states**. Tyrannical lawmaking has an impact across member states since the tyrannical lawmaking model **impacts the integrity and foundations of the EU** and can proliferate among member states. It must be stopped at its roots. The **Nuremberg Trials** concluded that lawmaking can be a criminal act. It is high time to take this lesson seriously in the EU.

The citizens of the EU rely on their elected representatives. **You**, as a politician are responsible for the six fundamental values and for the citizens of the EU. Please find those corrupt politicians who prefer profit to fundamental values and humiliate them by articulating the absurdness of their arguments. The six fundamental values will survive only if the violation of these values will be penalized. **The Hungarian lawmakers are ridiculing the six fundamental values of the EU**. In our educated opinion: referendums are blocked by a biased committee; independence of the power branches does not hold; the new constitution was accepted unlawfully in 2012 (constitutional capture); the mafia government manages the public money with organized crime without democratic guarantees or transparency; the media is government propaganda (even against the EU); critical voices are silenced, fined on streets; journalists are banned from Parliament; local councils lost critical rights; **Russian, Turkish, Chinese (tyrannical) influence is at all time high**; etc. This is extremely dangerous to Europe's society and to Europe's peace. In our educated opinion it is a crime. A crime committed by lawmakers by violating the fundamental values of the EU. It is an assault against law. Hence, it is also a crime to tolerate this, to accept this, to be passive, and watch how fundamental values are killed, pillars ruined. Hungary is oppressed. Europe is under attack. **You are responsible!**

Please demonstrate that you are an advocate of the six fundamental values! Please prove that you are not representing the profit above the six fundamental values, let alone tyrannical world powers that try to weaken the European values by corrupt lawmakers! **The EU is a sanctuary** for democracy, rule of law, freedom, equality, human dignity, human rights. Please demonstrate: **virtue exists in the EU!**

Sincerely Yours, Plato Political Party of Hungary
dr. Szilvia REKETYEI, President, dr. Miklos VAZSONYI, Vice-president

Stop the tyrannical lawmaking in the EU! Stop serving the profit in favor of the six fundamental values! Please start penalizing the tyrannical lawmaking in EU-level criminal code at zero tolerance!

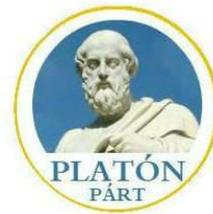

The Article 7 procedure against Hungary is ineffective, toothless. But, based on the **Lisbon Treaty** the EU has **jurisdiction to define new criminal code acts** in those cases where the type of crime has an impact **across member states**. Tyrannical lawmaking has an impact across member states since the tyrannical lawmaking model **impacts the integrity and foundations of the EU** and can proliferate among member states. It must be stopped at its roots. The **Nuremberg Trials** concluded that lawmaking can be a criminal act. It is high time to take this lesson seriously in the EU.

The citizens of the EU rely on their elected representatives. **You**, as a politician are responsible for the six fundamental values and for the citizens of the EU. Please find those corrupt politicians who prefer profit to fundamental values and humiliate them by articulating the absurdness of their arguments. The six fundamental values will survive only if the violation of these values will be penalized. **The Hungarian lawmakers are ridiculing the six fundamental values of the EU**. In our educated opinion: referendums are blocked by a biased committee; independence of the power branches does not hold; the new constitution was accepted unlawfully in 2012 (constitutional capture); the mafia government manages the public money with organized crime without democratic guarantees or transparency; the media is government propaganda (even against the EU); critical voices are silenced, fined on streets; journalists are banned from Parliament; local councils lost critical rights; **Russian, Turkish, Chinese (tyrannical) influence is at all time high**; etc. This is extremely dangerous to Europe's society and to Europe's peace. In our educated opinion it is a crime. A crime committed by lawmakers by violating the fundamental values of the EU. It is an assault against law. Hence, it is also a crime to tolerate this, to accept this, to be passive, and watch how fundamental values are killed, pillars ruined. Hungary is oppressed. Europe is under attack. **You are responsible!**

Please demonstrate that you are an advocate of the six fundamental values! Please prove that you are not representing the profit above the six fundamental values, let alone tyrannical world powers that try to weaken the European values by corrupt lawmakers! **The EU is a sanctuary** for democracy, rule of law, freedom, equality, human dignity, human rights. Please demonstrate: **virtue exists in the EU!**

Sincerely Yours, Plato Political Party of Hungary
dr. Szilvia REKETYEI, President, dr. Miklos VAZSONYI, Vice-president
